

## 2011-2012 FACT SHEET

### **About IDM Technologies Group**

Founded in 2007, IDM Technologies Group is a privately held company that develops and deploys comprehensive business information management systems for the healthcare industry.

IDM Technologies Group partners with leading technology companies to deliver its LabTrack™ point-to-point specimen tracking technology to prevent the loss or misplacement of specimens.

LabTrack™ combines radio-frequency identification (RFID) technology and proven data gathering and analysis capabilities to help ensure a higher quality of patient care, increase lab technician productivity and decrease lab operating costs. The technology is used in hospital-based clinical laboratories, independent diagnostic labs, and labs specializing in esoteric testing.

### **Corporate Headquarters**

IDM Technologies Group has relocated from the Seattle area to the Phoenix area.
